Two Blowers Connection Set DN110

For

- Connecting two blowers if two blowers are used in one system
- Ensuring correct air-flow if one of the blowers is switched off (otherwise the operating blower would drive the switched off blower reverse)
- Having two non-return valves (one for each blower), every one of the blowers can be the one that runs on slow speed – this gives the system a redundant air supply

Installation

- Is placed between the blower connection set and the air diverter

Material: PVC-U

Colour: RAL 7011 iron grey

Dimensions

- Tube: Do110

Weight: 1.28 kg

Delivery Scope

- Two T-pieces
- Two non-return valves
- Two device sleeves
