

1.2541.0.06 / 1.2543.0.06

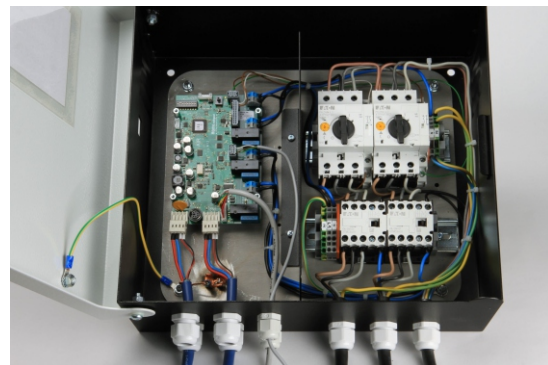

Blower Controller H61F AIR CARD 400 V with Brake Relais

1.2541.0.06

1.2543.0.06

For

- Controlling three-phase blowers
- If the system has two blowers for two speeds the 1.2543.0.06 can control both blowers
- Controlling the central brake
- The double blower set can be configured to be a redundant pair. Each blower can be scheduled to be the main blower.

Characteristics

- Air Card in-built
- Relais outputs for 240 V contactor coil
- Contactors and motor protection switch for up to 6 A
- Two monitoring contacts for motor protection switch to report a motor error to the control system
- Relais outputs for central brake
- Input power cable with CEE plug
- Oil-flex cable for input and output

Installation

- Besides blower

Input voltage

Three-phase 400 VAC

Housing

Material: sheet-steel, powder-painted
Protection class: IP20

Delivery Scope

- Blower controller including connection cables

Optional

- Alternative 10 A instead of 6 A (1.2541.0.10 / 1.2543.0.10)
