Blower Controller H61F AIR CARD 400 V – Reversing

For

- Controlling three-phase blowers
- Reversing contactor circuit to operate one blower in two directions
- Controlling the central brake

Characteristics

- Air Card in-built
- Relais outputs for 240 V contactor coil
- Contactors and motor protection switch for up to 6 A
- Monitoring contact for motor protection switch to report a motor error to the control system
- Relais outputs for central brake
- Input power cable with CEE plug
- Oil-flex cable for input and output

Installation

- Besides blower

Input voltage

Three-phase 400 VAC

Housing

Material: sheet-steel, powder-painted
Protection class: IP20

Delivery Scope

- Blower controller including connection cables
