

1.1163.0.P2

Power Supply with Bridge H61F/G

1.1163.0.P2

Application

- For System H61F and H61G

Characteristics

- Bridge refreshes the bus signals
- Data uplink to previous bus segment is insulated
- Power-off follows previous power supply
- Bridge card is an addressable component for maintenance
- The internal power supply with 250 W can supply 20 stations and diverters

Integrated

- One CAN bus interfaces opt coupled
- One CAN bus interface without opto coupling
- One Power cable with SCHUKO plug
- Two fuses for power input

Input voltage

100 to 240 VAC

Output voltage

48 V

Housing

Protection class: IP20

Dimensions: 350 mm (w) × 320 mm (h) × 155 mm (d)
